

East Metro Version 11

SwitchList Generator Template Guide

There is an excellent set of maps of this route available for download at www.train-sim.com. Download the file [mtromaps.zip](#), this will help you to find all the spurs in the workorders SwitchList Generator creates.

Here is a list of the spurs/tracks and the regions they are in.

Track Name	RegName
BC Coal (Empties)	BC
BC Coal (In)	BC
BC Yard 1	BC
BC Yard 2	BC
BC Yard 3	BC
BC Yard 4	BC
BC Yard 5	BC
	BC
BC Interchange 1	INTERCHG
	BC
BC Interchange 2	INTERCHG
	BC
BC Interchange 3	INTERCHG
BC Oil 1 (Inbound)	BC NORTH
BC Oil 2 (Inbound)	BC NORTH
BC Oil 3 (Inbound)	BC NORTH
BC Oil 4 (Loading)	BC NORTH
BC Oil 5 (Loading)	BC NORTH
BC Oil 6 (Outbound)	BC NORTH
BC Oil 7 (Outbound)	BC NORTH
BC Oil 8 (Supply)	BC NORTH
BF Transfer 1 (Outbound)	BF
BF Transfer 2 (Outbound)	BF
BF Transfer 3 (Inbound)	BF
BF Transfer 4 (Inbound)	BF
Madison Team Track	BF
Dalton Particle Board	E METRO
E. Metro 1	E METRO
E. Metro 4	E METRO
E. Metro 5	E METRO
E. Metro Train Shed Storage 1	E METRO
E. Metro Train Shed Storage 2	E METRO
Natural Foodstuffs 1	
(Incoming)	E METRO
Natural Foodstuffs 1	
(Outgoing)	E METRO
Oliver's Food Supply (Inbound)	E METRO

Oliver's Food Supply (Outbound)	E METRO
Pearson's Imports 1	E METRO
Pearson's Imports 2	E METRO
Stanton Research	E METRO
Thompson's Plastics	E METRO
Woody's	E METRO
LutherLex Coal 1 (Loader)	LUTHER
LutherLex Coal 2 (Loader)	LUTHER
LutherLex Coal (empties)	LUTHER
LutherLex Coal 4 (Outbound)	LUTHER
LutherLex Coal 5 (Empties)	LUTHER
LutherLex Coal 7 (Supply)	LUTHER
Lutherlex Outbound	LUTHER
Millennium Grain (feed 1)	MILLENNIUM
Millennium Grain (feed 2)	MILLENNIUM
Millennium Grain (In)	MILLENNIUM
Millennium Grain (Load)	MILLENNIUM
Millennium Grain (Out)	MILLENNIUM
Glennville Supply	OC

Interchange 1	TITAN
Interchange 2	TITAN
Interchange 3	TITAN
Interchange 4	TITAN
Interchange 5	TITAN
Interchange 6	TITAN
Weber P 1 (In)	WEBER
Weber P 2 (In)	WEBER
Weber P 3 (In)	WEBER
Weber P 4 (storage)	WEBER
Weber P 5 (Out)	WEBER
Weber P 6 (Out)	WEBER
Weber P Rip	WEBER
Krenshaw's 2	WOODBERRY
Krenshaw's 3	WOODBERRY

Krenshaw's 4	WOODBERRY
Krenshaw's 5	WOODBERRY
Krenshaw's Saw Mill 1	WOODBERRY
Woodberry Loader 1	WOODBERRY
Woodberry Loader 2	WOODBERRY
Woodberry Loader 3	WOODBERRY

For ALL of the paths, we recommend you DO check the “Check to allow setouts to come from yard tracks in different regions than the Industry track being serviced.” For further guidelines please see the specifics of each path, below.

BC-Millennium Turn

A fairly short run, along the east-west main line. Since it's a turn (you can run out and back) you can work in any order. Usually you'll assemble a train in Big City (BC) Yard, and you might call for work at BC Interchange along the way, ending up at Millennium Grain. To work Millennium Grain it's likely you'll need to use your front coupler (there's no wye track to turn on), so if you dislike using the front coupler, check the map to select only trailing-point spurs. You may have to ask the dispatcher for permission to pass a red signal, as you cross over to Millennium. You'll be crossing the AI traffic path, so be careful!

BC-Weber Turn

Similar to the BC-Millennium Turn, you can work out and back, or just work one direction. You don't need to cross the AI traffic on this run. You may have to use the front coupler for this one too.

BC-Titan City

A one way run, the full length of the north-south portion of the route. Of course you don't have to run all the way, how far you have work will depend on which regions you choose to work. You should check all the Yard tracks in BC, but no other yard tracks in other regions, or you run the risk of SwitchList Generator calling for a pickup in a yard track to be set out on a spur you've already passed. Since this is a one-way trip, this won't work!

East Metro – Luther.

This is actually a “turn”, meaning you can run out to Lutherlex and back. There’s a wye at Lutherlex for turning. You should always check all the Yard tracks in East Metro to work. If you’re going to check yard tracks in Smallville also, be careful to either not check any Industry tracks in the East Metro region, or, check the map first and check only those Industry tracks in East Metro that you will be able to work on the RETURN run. You could also check some yard tracks in Lutherlex, but the same caution applies. This might cause SwitchList generator to have you pick up some cars in Lutherlex yard tracks and set them out in Lutherlex or Smallville industry tracks.

East Metro – Oil City Turn

Another out and back turn, with a wye at the end (in Oil City). Check all the East Metro yard tracks, and you can work all the East Metro Industry tracks also if you like, using the rear coupler, since some will be “trailing point” switches on the way out, and others will be trailing point on the way back.

East Metro – Titan City

One way run, out to Titan City (the end of the line). Check all the yard tracks in East Metro, no yard tracks in other regions, and off you go!

Luther Switcher

Work the Lutherlex plant, picking up empties from the Yard tracks and setting them out at various loading tracks. You may also be asked to pick up some of the loads. A good job for when you just have a short time and want to do some switching.

Millenium Switcher

Same as the Luther Switcher but works Millenium Grain.

Smallville – East Metro

One way, so, ONLY check Yard tracks in Smallville, not in East Metro. If you don't like using the front coupler, then check the map and only choose Industry tracks to work that can be reached with the rear coupler in the Southbound direction.

Smallville – Woodberry

This is another turn, meaning you can run out and back. However, a word of warning: there is no wye at the end of this run, so you may have to use your front coupler if you have any work on the return run. Then again you can select work in just Smallville and Krenshaw's. If you choose spurs that are trailing point on the outbound trip, you can avoid using the rear coupler. Check the map.

Titan – Woodberry

A one-way run from the yard in Titan, up the logging branch through Kershaw's and into Woodberry. Check only the Yard tracks in Titan yard, and any industry tracks you'd like to work.

Weber Switcher

Work the Weber plant, picking up empties from the Yard tracks and setting them out at various loading tracks. You may also be asked to pick up some of the loads. A good job for when you just have a short time and want to do some switching.
