

TRACK DIAGRAM FOR LEHIGH VALLEY ROUTE V2

Route by Werner Mueller

Diagram by Craig Kawahara

Red lines denote track alignments.

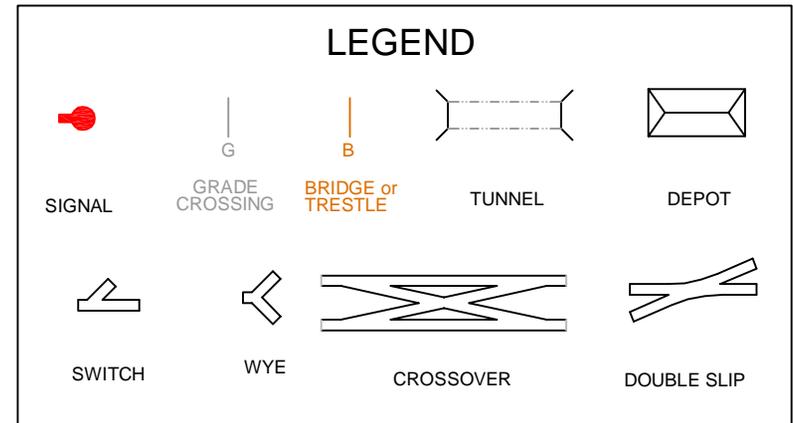

This diagram depicts the route of the Lehigh Valley V2 route for Microsoft Train Simulator. There is no scale. The grade crossings, bridges, etc., are for reference. They are not in their true milepost positions. It's main purpose is to serve as a guide to locate station and siding names.

Thanks to Norm Beveridge and Don Klaebal for their assistance.

Track Ownership
